Advancing dental practices

Supplies • Equipment • Design
Repairs • Financing • Transition

The Clinical Facts.

Our patented Sonicare technology creates unique dynamic fluid cleaning action, making it exceptionally effective and gentle:

- Removes 3 times more plaque biofilm beyond the bristles than the leading rechargeable oscillating toothbrush¹
- Is clinically proven to reverse gingivitis and help shrink periodontal pockets²
- Is up to 4 times gentler on dentin than the Oral-B 3D Excel product line³

The Invigorating Feel.

Only Sonicare makes your mouth tingle with a stimulating clean—for a brushing experience professionals and patients actually enjoy:

- That's why 98% of dental professionals who used Sonicare Elite® for 90 days would recommend it to their patients⁴

Sonicare—patented technology specifically designed to deliver credible results so incredibly well.

Stop Brushing ● Start Sonicare

PHILIPS

1. Hope CK, Wilson M. University College London, Eastman Dental Institute. Am J Dent 2002;15(Special Issue):7B-11B. (in vitro study versus the other leading power toothbrush)
2. Donly K. University of Texas. Data on file. (in vivo study)
3. Sorenson JA, Nguyen H. Oregon Health and Science University. Am J Dent 2002;15 (Special Issue):26B-32B. (in vitro study versus the other leading power toothbrush)
4. Based on a 90-day practice-based brand-identified monadic evaluation of Sonicare Elite with Registered Dental Hygienists.

Flexibility and precision for esthetic restorations.

Screw or cement-retained, anterior or posterior, the unique implant-level impression capability of the synOcta prosthetic system offers you the flexibility, precision and reliability to successfully treat prosthetic cases at all levels of complexity. The synOcta family of abutments is compatible with all Straumann implants and provides the entire range of options you need for superior long-term esthetic results in every clinical situation.

c it grin.

We have a financing plan that'll give you something to smile about.

How did CIT become Canada's market leader in healthcare financing? Experience. We've been working closely with the industry for nearly forty years.

That kind of expertise allows us to answer any questions you might have about your specific needs, and to provide sound advice culled from similar situations we've dealt with in the past. It also allows us to create customized financing solutions that are right

for you—quickly and painlessly. To learn more about equipment, real estate, or practice financing, click on CIT.com or call 877.590.7356.

At CIT, we see what you see.®

Winter Clinic Important Information

North Building, Metro Toronto Convention Centre

Pre-Registration & On-Site Registration:

Fees for all categories are payable to the Toronto Academy of Dentistry.

Please use one (1) form per office, registering attendees under applicable category. Please photocopy to add additional registrants per office, but only if necessary.

The registration fee includes admission to the clinics, exhibits and lunch.

All registration fees include GST. (#123000879).

The office will accept NO REGISTRATIONS after Friday, Dec. 3, 2004. The office will be closed on Thursday, Dec. 9, 2004 (the day before Winter Clinic) and Friday, Dec. 10, 2004.

Association Membership:

ODA Dentist Members, regardless of their membership status, must have their full ODA dues paid prior to pre-registering or registering on-site. If current membership dues are not showing paid, non-member fees will apply.

ODHA, ODN&AA and RDT membership fees must be paid to their associations prior to pre-registering. Please make sure the name (maiden or married surname) that appears on the registration form is the same that is listed with your association.

Payment of Fees:

Make cheques payable to the Toronto Academy of Dentistry and mail to:
Ste. 902 – 170 Bloor St. West
Toronto, Ontario M5S 1T9
Or fax registration forms along with credit card number to (416) 967-5081.

Registration forms faxed indicating payment by cheque will not be accepted and must be mailed along with the cheque.

Limited Attendance:

Drs. L. Bud Krasne, Anton Gotlieb, and S.W. Askinas' program is a limited attendance presentation for Dentists and Dental Technologists only. You must be registered for the entire day and indicate on the registration form if you will be attending this lecture. This portion requires a \$25 cheque, to be accompanied with your registration fee, and will be returned at the door providing you attend this lecture. "No Show" cheques will be cashed.

Dr. Antonio Mancuso's program is a limited attendance presentation for 4th Year Dental Students and New Dentists. Indicate your attendance on the registration form.

Cancellation and Refunds:

You will be issued a refund less a \$50 administration fee until November 26, 2004. Between Nov. 27, 2004 and Dec. 3, 2004, a 50 per cent refund only. There will be no refunds after Dec. 3, 2004

Badge Pick-up:

Badges will not be mailed; you must pick them up at your assigned registration desk. All badges will be receipted on the back.

Exhibit Hours, Clinics and Lunch:

Exhibits are open from 10 a.m. – 6 p.m.

All exhibits are located in Halls A & B on the exhibit floor of the NORTH Building of the Convention Centre. SUPPORT YOUR EXHIBITORS!! TAKE ADVANTAGE OF THE MANY HANDS-ON PRESENTATIONS & TRY BEFORE YOU BUY!

Again there will be the "Power Hour" sessions, informative one-hour sessions covering several aspects of dentistry. Power hours allow you to get the most out of your day attending clinics and visiting the exhibit floor.

Lunch – 12 p.m. to 2 p.m. in Exhibit Halls A & B

Attendance Verification for RCDSO Continuing Education Credit:

You will receive 6 ODN&AA credits for attending Winter Clinic. Verification cards will be in your envelope that will be given out at registration. This card must be stamped for Continuing Education credit. Accreditation desks will be set up at the south ends of 200 & 1300 aisles.

Your name badge is your receipt of payment and should be retained for income tax purposes.

Academy of General Dentistry receives six credits. Their booth is located near the centre escalators.

ODN&AA receives four credits. Visit booth # 819, 821.

Remember to register your staff. They need continuing education credits too!

Help put a smile on a child's face!

Children's Aid Foundation will be in attendance at Winter Clinic and will host a 50/50 draw. 100% of proceeds from the draw will be directed to the Academy of Dentistry's Dental Fund. Please support this worthy cause!

Our Academy

The TORONTO ACADEMY OF DENTISTRY, formerly the Toronto Dental Society, has been functioning continuously since 1890. It has provided leadership and service to both the profession and the community, and will continue to do so in the future.

BENEFITS OF MEMBERSHIP provided are as follows:

1. The annual WINTER CLINIC.
2. After hour's EMERGENCY TREATMENT service for the public.
3. The annual WINTER CLINIC/INFORMATION BOOK, a directory of dental organizations.
4. Quartley Newsletter-addressing Toronto Issues.
5. PUBLIC RELATIONS, an experienced staff person to answer the public's queries and complaints.
6. An ELECTED COUNCIL, representing all Metro Toronto dentists and their local component societies.
7. CO-ORDINATION of dental and fellowship functions within Metro Toronto.
8. DENTAL MEETINGS with excellent programs and clinicians.
9. Assistance in formation of new STUDY GROUPS.
10. HONOURARY LIFE MEMBERSHIP to recognize outstanding dentists.
11. SERVICE AWARD to recognize a non-dentist who has given outstanding service to the profession
12. Fellowship activities such as the annual GOLF TOURNAMENT, CURLING BONSPIEL and SKI DAY.
13. MEDIATIONS SERVICES for the public.
14. COMMUNICATION with dental auxiliary organizations.
15. Provides an ASSOCIATE PLACEMENT service.
16. THE TORONTO COMMUNITY PROFESSIONAL DENTAL ASSOCIATION which donates to charitable organizations.

MISSION STATEMENT

The TORONTO ACADEMY OF DENTISTRY, a respected leader and resource to the dental profession in the Metropolitan Toronto Area since 1890, is dedicated to enhancing the professional lives of its members through guidance, education and service.

CORE VALUES

- *Advancement of the art and science of dentistry
- *To promote the highest ideals of dental practice
- *To cultivate harmony and good fellowship among the members of the dental community

THE VISION

The Toronto Academy of Dentistry is a not for profit association representing the dentists of Toronto. We are recognized as a leading, responsible, accountable and benevolent link between the dentists and our community.

THE PROCESS

A governing council of elected members will guide its actions in accordance with an established constitution.

*This is our Academy.
Keep it strong.
Support it;
Enjoy it.*

Shayne Lipton, DDS, Cert. Endo.,
President, Toronto Academy of Dentistry

Tim Milligan, B.Sc., DDS.,
Winter Clinic Chairman

It is our pleasure to welcome the dental community to this year's Toronto Academy of Dentistry's Winter Clinic.

We are presenting this year's extravaganza on Friday Dec. 10, 2004. Winter Clinic offers you many new and innovative changes. The first change to note is the fact that the starting times for the lectures will be staggered. Some lectures will begin at 8:30 in the morning.

Staggering the schedule of the lectures will give you lots of time to stroll the exhibit floor. The theme this year is "A Hands-On Experience." Many dental exhibitors will make their products available for you to try, while you and your staff roam the exhibit floor. Imagine what a great opportunity this is for you to find out which dental products work best in your hands; while having all the different dental supply companies within steps of each other.

This year's Winter Clinic will continue to offer world-renowned clinicians, presenting interesting topics for every member of the dental team. Topics range from those advancing the art and science of dentistry, to other subjects on how to improve your lifestyle, both psychologically and physically.

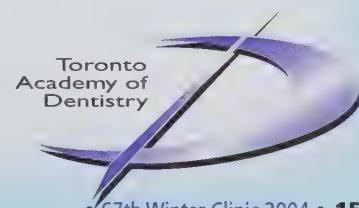

By attending Winter Clinic, you are not the only person to benefit. Through the Toronto Academy of Dentistry's Endowment Fund, many organizations like the Children's Aid Foundation, Bloorview MacMillan Children's Foundation, The Hospital for Sick Children, Kids Help Phone, March of Dimes, About Face, Daily Bread Food Bank, Easter Seals, the University of Toronto Faculty of Dentistry, and Women in Transition benefit greatly from the donations made possible by your participation at Winter Clinic.

We would like to thank the Winter Clinic Committee, the academy staff, the ODHA, the ODN&AA, the Dental Industry Association of Canada and our sponsors for their input and commitment that makes Winter Clinic such a success.

Come and enjoy the learning experience, the "Hands-On Experience" of the exhibit floor and the camaraderie of the day, Friday Dec. 10, 2004.

Cutting Edge

68th Winter Clinic

Friday, Nov. 18, 2005

Greetings

GREETINGS FROM THE ONTARIO DENTAL HYGIENISTS' ASSOCIATION

Michele Carrick, RDH, President

Welcome to the Toronto Academy of Dentistry's 67th Annual Winter Clinic.

Every year, the Winter Clinic hosts an exciting and varied roster of speakers that will be of interest to the entire dental team. The exhibit floor will once again provide an excellent opportunity to see what's new in oral healthcare products and equipment.

As part of our growth and responsibilities as healthcare professionals, we must seek out professional development opportunities and investigate current research and procedures that will enhance our abilities to provide quality care to our clients. Winter Clinic provides us, as registered dental hygienists, with several options to help maintain our professional portfolio and fulfill our quality assurance goals. It also provides us with an excellent opportunity to network and socialize with colleagues, exhibitors and other members of the dental team.

I would like to thank Catherine Grater-Nakamura for representing ODHA during the planning of Winter Clinic.

GREETINGS FROM THE ONTARIO DENTAL NURSES AND ASSISTANTS ASSOCIATION

Laura Mara, CDAll, CDTC, CDR, President

On behalf of the Ontario Dental Nurses and Assistants Association (ODN&AA), I would like to welcome you to the 2004 Annual Winter Clinic.

As professionals, we have the responsibility to keep current on information, products and techniques in the dental industry. By attending continuing education seminars we have the opportunity to grow both professionally and personally. Winter Clinic is a great educational event for the entire oral health care team. Plan your day to include a full day, half day or a mini- seminar and visit the exhibit floor. Enjoy this time to network with your peers and meet others in the dental profession.

Be sure to drop by the ODN&AA booth on the exhibit floor. We would be delighted to meet you, listen to any comments and answer any questions you may have. Looking forward to meeting you!

GREETINGS FROM THE DENTAL INDUSTRY ASSOCIATION OF CANADA

Guylaine McCallum, President

The Dental Industry Association of Canada (DIAC) is pleased to welcome you and your dental team members to the "Hands-On Experience" at the 67th Annual Winter Clinic.

We are particularly honoured and proud to have worked with the dedicated Winter Clinic Committee of the Toronto Academy of Dentistry in developing a unique educational and exhibit floor experience that will help set a new standard for dental exhibitions in Canada.

Your trip to the exhibit floor today will prove to be more than your usual exposure to state of the art products and services. As well as the continuing education clinics, you will be invited by many exhibiting companies to experience hands-on product evaluations that will allow you to see first hand how different products and procedures will impact you in your real world practice.

All of this is yours, with our compliments, in a comfortable and stress free environment. Come on up and relax with colleagues in the lounge area and enjoy the lunch that will be served on the exhibit floor. Then drop by to visit your suppliers and manufacturers as they let you see for yourself how their products and services will improve your practice.

On behalf of DIAC and its member companies, thank you for continued patronage. We look forward to serving your needs, and making the 2004 Winter Clinic a hands-on experience to remember.

Mayor
DAVID MILLER

A Message from the Mayor

It gives me great pleasure to extend greetings and a warm welcome to all delegates attending the 67th annual Winter Clinic hosted by the Toronto Academy of Dentistry.

In a world of exciting and cutting-edge developments, clinics that offer and promote the tools that let you build on your clinical skills are welcomed. For dentists, dental nurses and assistants, dental hygienists and exhibitors, this one-day convention offers medical presentations and a trade show.

It is an excellent opportunity for you to discuss issues of mutual interest or concern, exchange ideas, best practices and the latest technological advances in the field of dentistry.

On behalf of Toronto City Council, I thank your organization and sponsors for making this event possible. To everyone, my very best wishes for a most enjoyable and informative day.

Yours truly,

A handwritten signature in dark ink that reads "David Miller". The signature is written in a cursive, flowing style.

Mayor David Miller

Toronto Academy of Dentistry Winter Clinic Program Book

The Canadian Dental Protective Association is proud to be a sponsor of the Academy's Annual Winter Clinic. We wish the Toronto Academy of Dentistry all the success at this year's meeting.

We are delighted to sponsor a lecture at Winter Clinic entitled:

"Managing Your Treatment Risk, A Litigation Lawyer and Clinician's Perspective"

featuring, **MR. ROBERT TIGHE**, litigation lawyer, and **DR. LIONEL LENKINSKI**, endodontist.
See the synopsis of the course elsewhere in this Program Book.

The CDPA is a Not-for-Profit Dental Association providing professional risk management advice to dentists when their professional livelihood is threatened. We are committed to helping our members when patient disputes arise, by providing assistance to them and when required, retaining experienced lawyers to help the dentist defend himself or herself.

To find out more, visit us online at www.cdpa.com or contact us at info@cdpa.com.

The categories are as follows:

PEOPLE

NATURE

ACTION

ONTARIO

Contest Rules:

1. All registrants of the Winter Clinic (dentists, hygienists, assistants, receptionists, technologists and exhibitors) are eligible to enter.
2. Only three photographs per person allowed. Entries may be digital or conventional (digital and conventional pictures will be judged separately).
3. Maximum size of the image is 11"x 14". All images must be mounted on white matte board only. Maximum size of the matte board is 16" x 20.
4. No frames or glass will be accepted.
5. A soft copy must be included with all digital picture entries.
6. Entries may be mailed or brought in person to:

The Toronto Academy of Dentistry
902 – 170 Bloor Street West
Toronto, Ontario, M5S 1T9

Must arrive no later than Friday, Nov. 26, 2004

7. Winners will be announced and prizes will be awarded at noon on the exhibit floor. All decisions made by the judges are final.
8. All entries may be picked up after 5 p.m. from the display area on the exhibit floor, or at the Academy office after Dec. 13, 2004.
9. Name, address, and phone number of the photographer must be printed on the back of each photo.
10. Category and title should be included with this information.

This form must be included with each entry.

I hereby allow the Toronto Academy of Dentistry to show my photograph(s) on their web page, at the Winter Clinic and/or in future Winter Clinic publications.

SmileLine

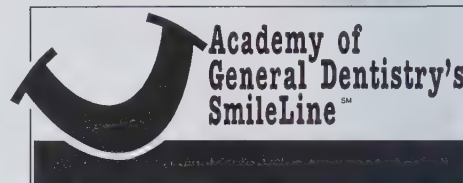

"SmileLine" is a toll free dental health hotline that consumers can call to talk one-on-one with a dentist.

During Winter Clinic, on Friday, Dec. 10, 2004, consumers will have a chance to get dental advice from members of the Ontario Academy of General Dentistry and Toronto Academy of Dentistry.

Anyone from Ontario with questions or concerns about oral health can call the SmileLine at 1- 800-SMILE 33 (1-800-764-5333) from 9 a.m. to 4 p.m. EST.

The National Smileline was created in 1991 by the Academy of General Dentistry to strengthen and increase consumer awareness about dental health issues.

To volunteer your time and service please complete the attached form and e-mail back to Dr. Kulwant Turna (You must be pre-registered for Winter Clinic to volunteer):

SmileLine Volunteer Form

Volunteering an hour of your time will help raise public-awareness for the Academy while answering consumer's oral health care questions and concerns. Thank you for your cooperation.

- The National SmileLine takes place on Friday, Dec. 10, 2004, from 9 a.m. until 4 p.m. during the 67th Annual Winter Clinic. You must be registered for Winter Clinic in order to volunteer.
- Fill in all the information clearly; illegible and incomplete forms cannot be processed.
- Deadline for receiving this information is Friday, Dec. 3, 2004.
- You will receive a SmileLine volunteer confirmation and instructions form once you have volunteered.

Please identify your one-hour time slot: from _____ to _____ (i.e. 9 a.m. - 10 a.m.)

Lunch and Learn Program

Fourth Year Dental Students, 2003 and 2004 Grads: Lunch and Learn Program

A special invitation to 2003 and 2004 dentistry graduates and fourth year dental students to attend Ontario Academy of General Dentistry's Lunch and Learn Program at the Toronto Academy of Dentistry's Winter Clinic Friday, Dec. 10, 2004.

Working Your Practice for the New Millennium

Antonio Mancuso, DDS., Welland, Ontario Time: 12:30 p.m. - 1:30 p.m. Room: 206 AB

About The Speaker

Dr. Mancuso graduated from the University of Toronto in 1985 and maintains a general practice in Welland, Ontario. He has written newspaper articles, appeared on Canada AM, and on the local cable network. He has published numerous articles for dental journals, is on the editorial board of the Canadian Dental Journal Spectrum, and has lectured in Canada and the United States. Dr. Mancuso is past CE chair and current president of the Ontario AGD. He conceived of and developed "Millennium Aesthetics" in Niagara, a live hands-on program teaching aesthetic diagnosis and treatment.

About the Program

This seminar deals with positioning your practice for the new millennium by teaching you how to "work on your practice rather than work in your practice." Dr. Mancuso believes you should "practice what you preach," and he will discuss internal marketing strategies, improving staff relations, techniques on understanding your patients, and how to improve the physical attributes of your dental practice.

You Will Learn

- DISC personality profiles
- E-Myth philosophy
- How to motivate your staff
- Internal marketing strategies
- Office design

This Program is Limited To 4th Year Dental Students and New Dentists.

Clinical Dental Pharmacology: Avoiding Prescribing Errors and Liabilities

Harold Crossley, DDS, Ph.D.
Cockeysville, Maryland

Time: 8:30 A.M. - 11:00 A.M.
1:30 P.M. - 3:30 P.M.

Room: 202 CD

Chair: Dr. Peter Tonisson
Dr. Donald Stewart

Of Interest To:

Dentists	Dental Hygienists
Clinical Assistants	Administrative Assistants

About the Speaker

Drawing on his unique background, Dr Crossley has become a nationally and internationally recognized expert on street drugs, chemical dependency and clinical pharmacology of dental drugs. A native of Rhode Island, Dr. Crossley is Professor Emeritus at the University of Maryland Dental School. His liaison between the classroom and his dental practice has produced a practical approach to understanding the pharmacology of drugs used in the dental office. He has co-authored many articles in the dental literature and three books within the field of pharmacology. He has been appointed to the Governor's Commission on Prescription Drug Abuse and is a consultant for the United States Drug Enforcement Administration.

About the Program

Most patients can be treated safely with the routine medications used in the dental office, but 10 per cent of patients will require some alteration of those medications. Which ones pose a problem and how do you treat those patients? Avoid liability and attend this presentation for an update on current medications, with a focus on indications, contraindications and mechanisms of action as it relates to your dental practice.

You Will Learn

- The control of postoperative dental pain. COX-2, COX-3 and NSAIDs
- The newest edition to the family of local anesthetics and why it is so popular
- SBE prophylaxis and recommendations for orthopedic joint prosthesis patients
- Management of orofacial infections
- Drug interactions and the top 20 most commonly prescribed medications
- Ecstasy, cocaine and speed as it applies to your dental patient

Who Should Attend This Program?

Dentists and their entire dental team who wish to acquire valuable information that can be immediately incorporated to help protect their patients and their practice.

What Others Have Said About This Program

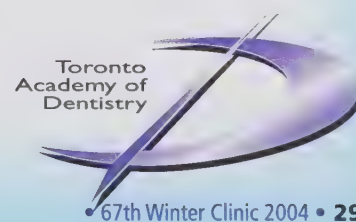

"The subject was very pertinent to everyday practice"

"Educational and entertaining at the same time"

"Excellent speaker; strong knowledge of subject matter that is relevant and practical"

"Presents in a lively manner"

What Good is a Dead Patient With Perfect Teeth?

David Mainz MS, RD, FADA, CSP
Orlando, Florida

Time: 9:00 A.M. - 11:30 A.M.
1:00 P.M. - 3:00 P.M.

Room: 206 CD

Chair: Dr. Nelly Himell
Dr. David Hanmer

Of Interest To:

Dentists	Dental Hygienists
Clinical Assistants	Administrative Assistants
Dental Technologists	

About The Speaker

Author and speaker, David Mainz, is a frequent guest on radio and television. He speaks internationally to audiences about how to live life to the fullest with maximum energy and health. David earned a Master's Degree in Human Nutrition in 1981. He is a registered dietician and fellow in the American Dietetic Association, an honour held by less than one per cent of all dietitians.

About the Program

David Mainz will reveal the latest about the food you and your patients eat. You will learn how to distinguish between the truth and the whole truth in food product health claims. This program is an upbeat, fun, hands-on presentation that will bring you up to date on the relationship between nutrition, health, productivity and energy.

You Will Learn

- How to energize your life
- Common causes of fatigue and how to fight back
- Fight the belly bulge
- Food smarts – top nutrition tips

This fun filled program is geared for the entire dental team wishing to learn the big picture in relationship to health and prevention, and how to apply this knowledge not only personally but also for the patients they see.

What Others Have Said About This Program

"What a feast!" "Your seminar provided so much food for thought that we are still talking about french fries, fat and fibre"

Ultimate Occlusion and Comprehensive Dentistry - The Big Picture

Gary Alex, DMD
Huntington, New York

Time: 9:00 A.M. – 11:30 A.M.
1:00 P.M. – 3:00 P.M.

Room: 205 CD

Chair: Dr. Anthony Liscio
Dr. Carolyn Poon Woo

Of Interest To:

Dentists	
Clinical Assistants	
Dental Technologists	

About the Speaker

Dr. Alex has researched and lectured internationally. He is a past president of the AACD New York Chapter and currently the director of the 'PAC Live' Ultimate Occlusion and Comprehensive Dentistry program as well as co-director to the Long Island Center for Dental Esthetics and Occlusion. Dr. Alex regularly conducts and participates in scientific studies on materials and adhesives. With a background in chemistry and adhesive technology he is a consultant for numerous manufacturers. Dr. Alex maintains a comprehensive prosthetic and cosmetic dental practice in Huntington, New York.

About the Program

The successful integration of prosthetics, cosmetics, interdisciplinary dentistry and occlusion is a powerful combination that can elevate your practice to new levels of care and service. This program will tackle fundamental occlusal principals and find answers to many questions you've been asking. A rational approach will be developed to tackle restorative, prosthetic and cosmetic treatment for your patients.

You Will Learn

- Total dentistry for total success – the comprehensive exam is the place to start
- It looks great but will it last? – cosmetics and occlusion
- Esthetics and function – you must have both
- Neuromuscular occlusion – fact or fiction?
- Practical solutions to common prosthetic problems
- Where do you start a full-mouth rehabilitation? Steps from start to finish

Who Should Attend This Program?

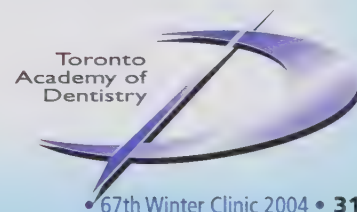

This program will be of interest to dentists, clinical assistants and dental technologists.

Forensic Dentistry: You Practice it Everyday – Do You Know How?

R. Tom Glass, DDS, Ph.D.
Tulsa, Oklahoma

Time: 8:30 A.M. - 11:00 A.M.

1:30 P.M. - 3:30 P.M.

Room: 201 EF

Chair: Dr. Bonnie Chandler
Dr. Paul Okorofsky

Of Interest To:

Dentists	Dental Hygienists
Clinical Assistants	Administrative Assistants
Dental Technologists	

About The Speaker

Dr. R. Tom Glass is a board certified oral and maxillofacial pathologist who is presently the chairman of the Department of Forensic Sciences, director of the Forensic Sciences Graduate Program, professor of Forensic Sciences, Pathology, and Dental Medicine, and adjunct professor of microbiology at Oklahoma State University Center for Health Sciences in Tulsa, Oklahoma. While he has been involved in over 4,000 medical-legal cases in his career, he is probably best known for directing the dental team that identified the 167 bodies in the Murrah Federal Building bombing in Oklahoma City, April 19, 1995.

About the Program

Every member of your office practices forensic dentistry every day. Forensic dentistry is more than just body identification by dental means. It is also concerned with the pattern injury on a child or young women that represents evidence of child or spousal abuse. It is the patient who reports two days after a motor vehicle accident with complaints of TMJ pain. It is last year's problem patient who has hired an attorney. At the end of this course, participants should be able to integrate forensic dentistry into their everyday practice. He will examine issues relating to mass disasters, pattern injury analysis, personal injury analysis, malpractice analysis, and expert-witness testifying.

You Will Learn

- Not only the procedures of body identification by dental means, but also your role in the process.
- Dentistry's role in mass disaster response.
- How to recognize pattern injuries on your patients, how to identify such pattern injuries as bite marks, and to know how to collect the necessary evidence that can be used in a criminal prosecution.
- How to conduct a complete personal injury analysis and to prepare a report.
- How to evaluate a case of alleged malpractice in terms of standard of care, negligence, and injury.
- How to perform as a fact witness and as an expert witness.

Who Should Attend This Program?

Dentists, Dental Hygienists, Dental Nurses and Assistants, Dental Technologists, Office Staff and Guests.

(Note: All audience members must be over 18 years of age.) No limit to size of audience.

What Others Have Said About This Program

"He teaches you forensics – not just shows you a group of unrelated cases."

"I have attended other forensic dentistry courses, but Dr. Glass' course is the best I have ever had."

"He not only teaches you forensics, but he talks about the impact of the work on those who do it – he puts a human touch to it."

"What an impact this course had on me."

Creating Your Patient's Comfort Zone

Anne N. Guignon, RDH, MPH
Houston, Texas

Time: 9:00 A.M. - 11:30 A.M.
Room: 201 CD

Chair: Catherine Grater-Nakamura, RDH

Of Interest To:

Dentists	Dental Hygienists

About the Speaker

Anne Guignon is an internationally recognized speaker who is passionate about creating an environment that promotes more exciting careers for dental professionals. Her programs are timely, straightforward, practical and fun. Anne writes the Comfort Zone column in RDH Magazine and has written featured articles for many other publications. In addition she has authored chapters on ergonomics and instrumentation for dental hygiene textbooks. Anne has practiced clinical dental hygiene in Houston, Texas, for more than 30 years and is an active ADHA member. She is the recipient of the Sonicare RDH Mentor of the Year Award.

About the Program

Relaxed, satisfied patients are a joy to treat. A variety of strategies and products are available to make dental hygiene procedures more comfortable for everyone. Patients experiencing a positive relationship with their dental hygienist are more compliant, more willing to accept needed treatment, and become rich referral sources for new patients. In this presentation you will learn how to become our patient's new best friend while helping them achieve a greater level of health.

You Will Learn

- Create a lower stress environment for apprehensive dental patients
- Effectively treat gaggers and sensitive patients
- Strategies to help patients with xerostomia
- Recognize and treat tooth sensitivity vs. gingival hypersensitivity
- Strategies to help patients in critical and long-term facilities
- Understand the role of sealants in adult patients
- A fresh look at power scaling, polishing, desensitizing and remineralization

Who Should Attend This Program?

This program is geared for those interested in expanding their knowledge and improving the comfort of their patients during dental hygiene procedures.

What Others Have Said About This Program

- "Speaker is sensible and sharp"
- "How refreshing to listen to someone with passion and enthusiasm"
- "This sparked me to make professional and personal changes"

Neutralizing Toxic Body Postures

Anne N. Guignon, RDH, MPH
Houston, Texas

Time: 1:00 P.M. - 3:00 P.M.

Room: 201 CD

Chair: Gina Vasiliadis, RDH

Of Interest To:

Dentists	Dental Hygienists
Clinical Assistants	Administrative Assistants

About The Speaker

Anne Guignon is an internationally recognized speaker who is passionate about creating an environment that promotes more exciting careers for dental professionals. Her programs are timely, straightforward, practical and fun. Anne writes the Comfort Zone column in RDH Magazine and has written featured articles for many other publications. In addition she has authored chapters on ergonomics and instrumentation for dental hygiene textbooks. Anne has practiced clinical dental hygiene in Houston, Texas, for more than 30 years and is an active ADHA member. She is the recipient of the Sonicare RDH Mentor of the Year Award.

About the Program

Whether you work in the treatment room or business office, have you ever wondered why you are so fatigued at the end of the day? Do you know which habits increase your risk for developing a workplace related cumulative trauma disorder? This fun, information-packed program helps identify these stresses and will provide you with solutions and strategies that modify or eliminate career-destroying habits.

You Will Learn

- Identify and practice the components of proper operator positioning
- Understand the benefits of magnification loupes and illumination
- Ergonomic placement of dental equipment
- Evaluate the risks of heavy, coiled hoses
- What's new in ergonomic handpieces, polishing devices, ultrasonic handpieces and hand instruments
- Correct glove and mask selection
- What equipment and layout creates a safer business office

Who Should Attend This Program?

This program is geared for dentists, hygienists, assistants and business staff interested in maximizing their comfort and preventing repetitive strain injuries while performing daily procedures.

What Others Have Said About This Program

"I wish I had heard this information at least 15 years ago. Every hygienist who has had pain should know you!"

"Incredibly informative and very practical"

"Usually I anticipate leaving a program with one 'pearl.' I have written down twelve new or different activities that we can start using immediately"

Innovative Endodontics for the 21st Century

J. Craig Baumgartner, DDS, Ph.D.
Portland, Oregon

Time: 1:00 P.M. – 3:00 P.M.

Room: 201 AB

Chair: Dr. Sam Salama

Of Interest To:

Dentists	
Clinical Assistants	

About the Speaker

Dr. Baumgartner is currently professor and chairman of the Department of Endodontics and director of the Advanced Education Program at the School of Dentistry, Oregon Health and Science University in Portland Oregon, where he also maintains a part time clinical practice. He has published extensively and is currently associate editor of the *Journal of Endodontics* and on the editorial board of *Oral Surgery, Oral Medicine, Oral Pathology and Oral Radiology*. Dr. Baumgartner maintains a research laboratory for the study of infections of endodontic origin.

About the Program

With patients' increased desire to save their teeth, endodontic procedures are in greater demand. An improved understanding of biological principles and the recent convergence of better instruments, materials and techniques have revolutionized the practice of endodontics. Participants in this information packed program will learn how to make endodontics fun, more successful and more efficient by enhancing their knowledge of endodontic diagnosis, techniques for profound anesthesia, cleaning and shaping techniques, obturation of canals and uses of Mineral Trioxide Aggregate (MTA).

You Will Learn

- Make dependable pulpal and periapical diagnosis including "zebra" cases
- The biological basis for treatment
- Obtain profound anesthesia for symptomatic teeth using intraosseous technology
- Modern irrigants for cleaning and disinfecting the root canal system
- NiTi instrumentation
- 'Oregon Technique' - crown down continuous taper
- Obtain three-dimensional fill with the use of System B and the Obtura II
- The use of Mineral Trioxide Aggregate (MTA) for perforation repair, apical barriers, pulpotomies etc.

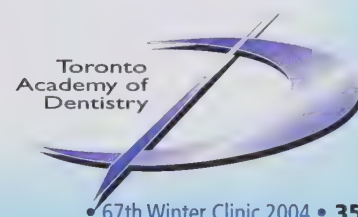

Who Should Attend This Program?

This program is geared for dentists and their assistants who wish to update and expand their knowledge and evaluate which new innovations should be integrated into their practice of diagnosis and treatment of pulpal disease.

Digital Photography: Practice Builder!

Martin B. Goldstein, DMD
Wolcott, Connecticut

Time: 8:30 A.M. - 11:00 A.M.
1:30 P.M. - 3:30 P.M.

Room: 202 AB

Chair: Dr. Ed Philips
Dr. Stephen Tsotsos

Of Interest To:

Dentists	Dental Hygienists
Clinical Assistants	Administrative Assistants

About the Speaker

Dr. Goldstein, a practicing dentist for 25 years, is a 1977 graduate of the University of Connecticut School of Dental Medicine. He completed post-graduate training in general dentistry at Yale University's general practice residency program affiliated with Waterbury Hospital in 1978. He served as an attending clinician at the University of Connecticut's School of Dental Medicine's undergraduate teaching program as well as an attending clinician at Connecticut Valley State Hospital's dental residency program. Dr. Goldstein's marriage of his digital photography habit and his love for cosmetic dentistry, as well as his ability to write about it in a friendly, conversational tones, have earned him a post as a frequent contributing editor for *Dentistry Today*. In addition, Dr. Goldstein is often featured in *Contemporary Esthetics* and *Restorative Practice and Compendium* as well as *Dental Town* and *Parkell Today*. His articles have also been reprinted in Great Britain, Australia and Canada.

About the Program

Much has been written about the virtues of digital photography as it relates to dentistry. All too often, however, the practice-building rewards promised by digital photography aren't realized due to a focus on the complexities of the process rather than on its everyday implementation. Looking for a streamlined approach to harnessing the power of digital imaging? Spend the day with Martin B. Goldstein DMD, and expect to be provided with the bare bones information needed to have a digital photography system up and running in short order. It won't stop there. In order to make a digital adaptation productive, Dr. Goldstein will explore in detail the three areas of digital implementation that have resulted in the greatest bang for the buck; including clinical methods and materials used to deliver the newly found dentistry that will result from digital co-diagnosis.

You Will Learn

- I. The Digital Photography Chair-Side System:
 - No-nonsense equipment selection with an emphasis on turn key operation.
 - Learn which shots to take and for what purpose as well as how to present them in a co-diagnostic treatment planning session.
- II. Digital Photography And Magnification To Validate Your Diagnosis:
 - A rationale for diagnosis and pre-emptive treatment of coronal fractures.
 - The use of the Diagnostic Restoration Removal, or DRR.
 - The use of magnification and digital photography to validate your diagnosis of asymptomatic coronal fracture, the most commonly found of the baby boomer dental disorders.
 - A rationale for choosing the right restoration
- III. The Cosmetic Simulation And Template Driven Composite Veneers:
 - Discover Smile Vision's online cosmetic imaging service and how to use it to gain case acceptance
 - Learn about the Templates for Success methodology that will enable you to confidently deliver what the cosmetic simulation promises
 - Explore creation of direct bonded composite veneers based on the digital cosmetic simulation without the need for free hand composite sculpting
 - Remove the anxiety associated with anterior dentistry
 - Learn marketing strategies that accompany the use of cosmetic simulations

Who Should Attend This Program?

Dentists and the staff that will be called upon to implement it, keeping in mind that clinical treatment modalities will also be a part of the presentation.

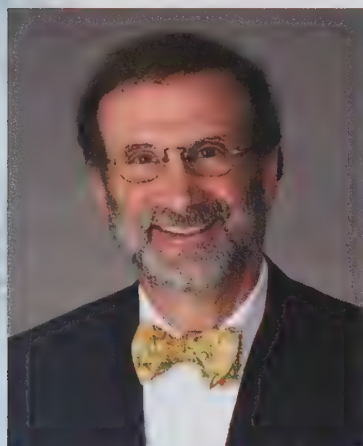

What Others Have Said About This Presentation:

- "Could be one of the best one day seminars that I have ever attended..."
- "Definitely info that I can take back to the office and use on Monday..."
- "Exceeded my expectations.... the presentation never dragged..."
- "I'm now ready to buy what I need to get started in digital photography in my office..."

Oral Pathology for the Joy of It... You are the Object of My Infection

John A. Svirsky, DDS, M.Ed
Richmond, Virginia

Time: 8:30 A.M. - 11:00 A.M.
1:30 P.M. - 3:30 P.M.

Room: 203 AB

Chair: Dr. Flavio Turchet
Dr. Gerry Pearson

Of Interest To:

Dentists	Dental Hygienists
Clinical Assistants	Administrative Assistants

About The Speaker

Dr. Svirsky is a board certified oral and maxillofacial pathologist at Virginia Commonwealth University. In addition to teaching, he has a broad background in research and has published numerous articles in the dental literature. He has a private practice of oral pathology and oral medicine in Richmond, Virginia. The American Dental Association awarded him with their Presidential Citation for significant contributions to the oral health of the public and the profession of dentistry.

About the Program

With 30,000 cases of oral cancer and continual changes in our patient's health, as a health care provider you cannot afford not to pay close attention to this critical subject. This program will be far different than others you may have participated in, in the area of oral pathology. Dr. Svirsky is an entertaining and informative presenter and teaches using his unique ability as a storyteller. The emphasis of this program is recognition, diagnosis and treatment of commonly encountered oral conditions with conventional and non-conventional remedies.

You Will Learn

- Things you have forgotten from dental school
- Oral brush biopsy and intralesional injections
- Dental student tricks
- Recognize, diagnose and treat common oral conditions

Who Should Attend This Program?

This memorable oral pathology experience is ideal for the entire dental office.

What Others Have Said About This Program

- "Funny informative and fast paced"
- "Wish we had him in dental school"
- "Entertained the entire time..."
- "Makes a tough subject fun and exciting"

A Team Approach to an Aesthetic Practice – The Power of a Smile

Lisa Philp, RDH, CMC
Burlington, Ontario

Time: 8:30 A.M. - 11:00 A.M.

Room: 203 CD

Chair: Wendy Bambridge, CDA II

Of Interest To:

Dentists	Dental Hygienists
Clinical Assistants	Administrative Assistants

About The Speaker

Lisa Philp is a 1987 graduate of East Tennessee State University as a registered dental hygienist, and is currently the president of Transitions Group; a coaching company for dentistry. As a leader and coach, Lisa is a leading speaker for major manufacturers, dental meetings and professional organizations. She couples her years of experience with the latest industry information to present an exciting and educational program. Lisa is active at the undergraduate level at the Faculty of Dentistry University of Toronto, and University of Western Ontario. Lisa is a certified management consultant and her articles have been published in the dental literature. Lisa's mission is to make dentistry simple and fun, allowing dental professionals to achieve personal and professional fulfillment in the workplace. Her passion and enthusiasm has impacted thousands of dental professionals.

About the Program

This motivational seminar will guide the entire dental team through a comprehensive approach to creating and maintaining a progressive aesthetic practice. You will learn what is needed to adjust your vision and mission to current concepts and move to the next level of success. The team will leave motivated and clear on how to implement the learned strategies.

You Will Learn

- Advanced business systems
- The essentials of scheduling
- The new patient experience
- How to overcome patient barriers
- The use of technology in patient education
- Improving laboratory communication
- How to market 'wants' dentistry

What Others Have Said About This Program

"I have the highest respect for Lisa, both personally and professionally."

"This course was current, clinically relevant, well organized and extremely well presented."

"The entire team had a fun learning experience."

Burlington, Ontario

Time: 1:00 P.M. - 3:00 P.M.

Room: 203 CD

Chair: Dr. Ron Traub

Of Interest To:

Dentists	
	Administrative Assistants

About The Speaker

Lisa Philp is a 1987 graduate of East Tennessee State University as a registered dental hygienist, and is currently the president of Transitions Group; a coaching company for dentistry. As a leader and coach, Lisa is a leading speaker for major manufacturers, dental meetings and professional organizations. She couples her years of experience with the latest industry information to present an exciting and educational program. Lisa is active at the undergraduate level at the Faculty of Dentistry University of Toronto, and University of Western Ontario. Lisa is a certified management consultant and her articles have been published in the dental literature. Lisa's mission is to make dentistry simple and fun allowing dental professionals to achieve personal and professional fulfillment in the workplace. Her passion and enthusiasm has impacted thousands of dental professionals.

About the Program

In every practice, the issue of downtime is a burning issue for everyone. With an appropriately designed program, the person responsible for booking the schedule will no longer need to operate from a place of urgency. Instead they will have several places to draw from in order to fill the voids. Simplifying the mystery of downtime management will help reduce your stress. All information is proven methodology for immediate results.

You Will Learn

- Advanced scheduling techniques
- Strategies to reduce downtime
- Active patient strategies
- Verbal skills for overcoming cancellations
- Reactivation of patients who have fallen through the cracks
- Making dentistry affordable
- Maximizing your success

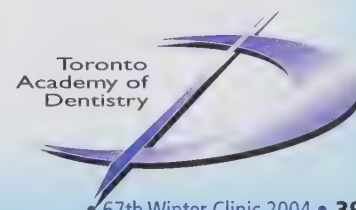

Who Should Attend This Program?

Geared for the entire dental team, this program will be of most value to dental team members who are responsible for patient scheduling and those handling the lifeline of the dental practice – the telephone.

What Others Have Said About This Program

"I have the highest respect for Lisa, both personally and professionally"

Countdown To Retirement

Barbara Jean Allen, BSc., CFP, FLMI
Toronto, Ontario

Time: 11:15 A.M. – 1:15 P.M.

Room: 201 EF

Chair: Dr. John Jenkins

Of Interest To:

Dentists	

About the Speaker

Barbara Allen is an experienced instructor and lecturer, having been a Pension and Retirement Savings Education Specialist with several large insurance companies, as well as having presented diverse financial planning topics at several recent dental conferences. She has more than 25 years experience in the insurance and financial services field, including Executive Financial Planning and benefit consulting. Barbara is a Certified Financial Planner with a broad knowledge of taxation, retirement and estate issues. She is currently an investment planning consultant with Professional Guide Line Inc. – A CDSPI affiliate, and provides comprehensive investment and retirement planning advice to dentists at all stages of their career.

About the Program

Retirement planning has an impact on every phase of a dentist's career, but the thinking, the priorities and the actions to be taken differ from phase to phase. In addition, the means of achieving a solid financial footing in retirement have not only become more extensive, but also increasingly more sophisticated and complex in recent years. Independent, unbiased advice has become critical in making appropriate choices within this ever-changing field. "Countdown to Retirement" will explore the career phases and will offer an explanation of the type, intent and suitability of the many strategies and options that become available as you advance in your career and as you transition into retirement.

You Will Learn

- Debt management strategies
- Basic RRSP strategies
- The value of a spousal RRSP
- The pros and cons of the Home Buyer's Plan and of Life Long Learning
- When to consult a professional adviser; who to consult
- The asset allocation process for registered and non-registered investments
- Tax efficient investing
- The IPP as an alternate vehicle to RRSP accounts
- Individually Managed Accounts (IMA); a customized alternative to funds
- The choice between RIF and Annuity
- Government sponsored retirement programs
- Retirement lifestyle issues
- Estate issues around charitable giving – how will you be remembered?

Who Should Attend This Program?

This seminar is recommended for dentists at all stages of their careers and their spouses, if in attendance. It will also be of value to career dental hygienists and dental assistants with substantial earnings.

Dental Technologists	

About the Program

By the year 2006, the number of people over the age of 65 will double. Most of these patients will require correction or replacement dentistry and sophisticated fixed bridgework will be beyond their reach and/or precluded from this work due to specific medical histories. The answer for them is removable prosthodontics. This demand for removable prosthodontics will be constantly increasing and those dentists not thoroughly comfortable in this discipline will be at great disadvantage amongst their colleagues.

Through a series of lectures, graphic presentations and hands-on participation, this program will guide the participants to attain accurate results with a minimum amount of patient adjustment and frustration.

Upon completion of this program attendees will:

- Have the working knowledge necessary for making effective accurate impressions and casts
- Be familiar with RPD components
- Become re-acquainted with the use and purpose of the surveyor
- Be knowledgeable in design and fabrication of trouble free immediate interim prosthesis
- Be knowledgeable of the relationship between occlusion and design
- Be knowledgeable of a simple foolproof impression technique to capture maximum available edentulous ridge
- Demonstrate the need for a harmonious working relationship and mutual respect between practitioner and technician

Who Should Attend This Program?

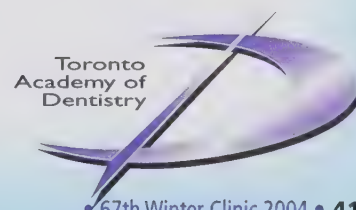

This program will be of interest to dentists, denturists, and dental technicians interested in expanding their knowledge and skills in removable prosthodontics

THIS LECTURE IS SPONSORED BY DENTSPLY CANADA LIMITED

Introducing Invisalign

Dr. Louis Shuman
Potomac, Maryland

Time: 11:00 A.M. - 12:30 P.M.
2:00 P.M. - 3:30 P.M. (repeat)

Room: 206 F

Chair: Dr. Gerry Zeit
Dr. Doug Jones

Of Interest To:

Dentists	Dental Hygienists
Clinical Assistants	Administrative Assistants

About the Speaker

Dr. Lou Shuman serves as vice-president of clinical education for Align Technology, the inventor of Invisalign. He is responsible for the clinical creation of all continuing education workshops in North America. He has lectured extensively on Invisalign throughout the United States and Canada. Prior to joining Align, Dr. Shuman was responsible for creating online education exclusively for the ADA, AGD, and State of Michigan Dental Society, as well as for national thought leaders, including Drs. Gordon Christianson, Peter Dawson and Frank Spear. Owner of a multi-doctor private group practice and specializing in adult orthodontics, Dr. Shuman has also had a successful career in dental practice management where he received numerous awards in professional marketing and community service.

About the Program

Invisalign is an esthetic orthodontic technique that corrects malocclusion using a series of custom-made, nearly invisible, removable aligners. Invisalign combines diagnosis and treatment plans with advances in 3-D computer graphics technology to move teeth in stages. Attendees will understand and identify different Invisalign case types, including those that present the highest degree of predictability. The case submission process will be presented as well as the numerous clinical support mechanisms that are available to aid the clinician every step of the way. Attendees will be presented with the benefits and impact this technique has in regenerating your existing patient base and attracting new patients to your practice.

You Will Learn

- What is Invisalign?
- How does it work?
- Case selection
- What are the benefits of Invisalign?
- How do you get started?
- Why there are over 135,000 cases currently under treatment or completed.
- Why over 70 per cent of orthodontists are utilizing this modality.

Who Should Attend this Program?

This course is designed specifically for the general practitioner and staff who wishes to incorporate Invisalign into their practice or simply learn more about this orthodontic technique and computer system.

THIS LECTURE IS SPONSORED BY ALIGN TECHNOLOGY INC.

invisalign®

Periodontal Diseases: What's the Link? Separating Fact From Fiction

Howard C. Tenenbaum, DDS, Dip. Perio, Ph.D., F.R.C.D.(C)
Toronto, Ontario

Time: 8:30 A.M. - 11:00 A.M.

Room: 205 AB

Chair: Dr. Ron Richardson

Of Interest To:

Dentists	Dental Hygienists
Clinical Assistants	Administrative Assistants

About The Speaker

Dr. Tenenbaum received his D.D.S. from the University of Toronto in 1978, and then completed his specialty in periodontology as well as a Ph.D., in bone cell biology by 1982. This was followed by a two year post-doctoral MRC fellowship in Bethesda at the National Institutes of Health. In addition to his degrees, Dr. Tenenbaum has a Fellowship from the Royal College of Dentists of Canada.

Dr. Tenenbaum is a professor at the Faculty of Dentistry, University of Toronto, is head of Periodontology, associate dean, Biological and Diagnostic Sciences and is cross-appointed to the Department of Laboratory Medicine and Pathophysiology, Faculty of Medicine. He is also the Head of Periodontics at Mount Sinai Hospital, and is an FDA panel member for Dental Devices and Drugs. He has had funding from the Medical Research Council of Canada (now Canadian Institutes for Health Research) for the past 20 years and has pursued ongoing research in the fields of bone cell biology, periodontics, and orofacial pain. He has published over 130 articles and abstracts in major scientific and clinical journals.

About the Program

There is currently a glut of information in both the scientific and popular literature that purports to demonstrate a causal link between chronic periodontitis and other systemic disorders including cardiovascular disease, cerebrovascular disease, osteoporosis, pre-term low birth weight infants, and diabetes. Although the associations between periodontitis and the aforementioned conditions may be sound, the actual causal relationships between them are less so. That is not to say that there is no causal or other mechanistic relationship. Indeed, it would appear that diabetes, for example, is likely exacerbated in the presence of periodontitis and vice versa. But what about the other conditions mentioned? A common factor linking all of the conditions, possibly excluding diabetes, is smoking and this may explain why there are statistical associations between periodontitis and other illnesses.

You Will Learn

- What's the evidence for links between systemic and periodontal diseases?
- What might the mechanisms of these links be?
- How should you discuss these issues with your patients?
- Cigarettes... the 'smoking gun'

Who Should Attend This Program?

This seminar is highly recommended for dentists, dental hygienists, and assistants.

Current Issues Facing Clinical and Administrative Dental Assistants in Ontario

Judy Melville, BA (Hons)
London, Ontario

Time: 11:15 A.M. - 1:15 P.M.

Room: 203 AB

Chair: Bonnie Darling, CPDA

Of Interest To:

Clinical Assistants	Administrative Assistants

About the Speaker

Ms. Judy Melville is a graduate from the University of Western Ontario. She is currently the executive director of the Ontario Dental Nurses and Assistants Association.

About the Program

The Ontario Dental Nurses and Assistants Association is pleased to have an opportunity to meet and discuss current issues facing clinical and administrative dental assistants within our province. Both members and non-members are welcome to attend this program that will be facilitated by Ms. Judy Melville, the executive director of the Ontario Dental Nurses and Assistants Association.

You will learn

- The need for dental assisting to be a regulated health profession
- Duties of dental assistants in other provinces
- Wages
- Workplace safety
- Updates on infection control

Who Should Attend this Program?

This is a unique opportunity for all clinical and administrative dental assistants, whether a member of the Ontario Dental Nurses and Assistants Association or not, to meet and discuss current issues that directly affect them now and in the future.

THIS LECTURE IS SPONSORED BY THE ONTARIO DENTAL NURSES & ASSISTANTS ASSOCIATION

Dentin Hypersensitivity: New Best Practice Guidelines for a Widespread Condition

Barry Dolman, B.Sc., DMD
Montreal, Quebec

Marilyn Goulding, B.Sc., RDH, MOS
St. Catharines, Ontario

Time: 8:30 A.M. - 11:00 A.M.
Room: 206 AB
Chair: Dr. Sheldon Cooper

Of Interest To:

Dentists	Dental Hygienists
Clinical Assistants	

About the Speakers

Dr. Barry Dolman

Dr. Barry Dolman maintains an active private practice in Montreal. He has served as a clinician and university lecturer, represented the dental profession as provincial director of the Quebec Dental Surgeons Association, president of the Canadian Dental Association, and national secretary for the FDI. He acts as a professional liaison consultant for industry and continues to provide educational communications through various media outlets.

Marilyn Goulding

With more than 30 years in clinical practice, dental research and education, Marilyn Goulding has developed impressive expertise. She holds degrees in Dental Hygiene Education, Clinical Research, graduate degrees in Periodontics & Biophysics, and is an alumnus of the University of Alberta and SUNY at Buffalo. She is on faculty at Niagara College in Ontario. Her career is enriched by interaction with the many clinicians and students she encounters in her travels and by her own continued pursuits in the dental hygiene field.

About the Program

In 1982, dentin hypersensitivity was described as an enigma, because it was frequently encountered yet ill understood. Twenty years later, it is worth re-considering this statement in light of recent findings of the Canadian Advisory Board on Dentin Hypersensitivity (JCDA, 2003). This presentation will review the definition, aetiology, diagnosis, mechanisms and management of the condition. It is hoped that, while there is still much to discover, dentin hypersensitivity is not the enigma it once was, as much has been learned, particularly concerning a scientific basis for prevention and management.

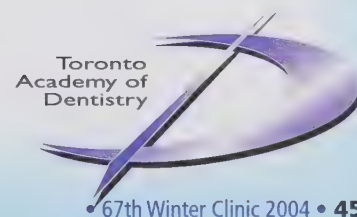

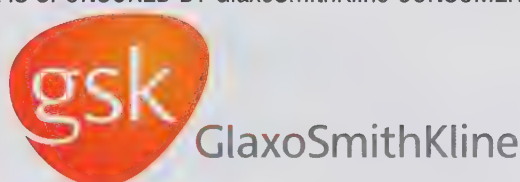

After Reviewing this Presentation, Participants Will:

- Increase their knowledge of the putative mechanisms, and the science behind dentin hypersensitivity
- Be informed about the most current management and treatment of dentin hypersensitivity
- Update their clinical skills to evaluate appropriate desensitizing therapies
- Be informed about the Canadian Consensus-Based Recommendations for the Diagnosis and Management of Dentin Hypersensitivity

Who Should Attend This Program?

This seminar is recommended for dentists, hygienists and assistants.

THIS LECTURE IS SPONSORED BY GlaxoSmithKline CONSUMER HEALTHCARE

Smiles, Love & Laughter – The Story Behind Love is the Best Medicine for Patients and the Dental Team

Don Dible
Temecula Valley, California

Time: 11:15 A.M. - 12:15 P.M.
1:15 P.M. - 2:15 P.M.

Room: 205 AB

Chair: Joy McNish
Dr. Gary Fortinsky

Of Interest To:

Dentists	Dental Hygienists
Clinical Assistants	Administrative Assistants
Dental Technologists	

About the Speaker

Don Dible graduated from MIT in 1962, with a degree in engineering. Seven years into his aerospace career he decided to retire as chief engineer in a large high-tech company, leave corporate life and explore a new career.... as an author. Don's first book was self-published and within two weeks of its debut was adopted as a text at Stanford, shortly followed by over 100 other universities. In 1982, he sold his first publishing company to a division of Prentice-Hall. In 1998, Don was invited to co-author Chicken Soup for the Dental Soul. Recently, he has produced a sequel to this work of delightful heartwarming dental stories. Since 1971, Don has participated in writing, editing, compiling and publishing 41 books.

About the Program

Don Dible believes there is a book inside every person. Don's remarks will convey the nuts and bolts of his book creation process and a long the way attendees will discover a new appreciation for the value of the services you perform as a dental professional. The heart-warming stories that will be brought out in this presentation will regain your "graduation day" enthusiasm for your chosen profession. Sometimes sad, but always poignant, the stories that will be shared are about real patients interacting with real dental professionals.

You Will Learn

- How to use stories to regain your enthusiasm
- How dentistry profoundly transforms the lives of dental patients
- How to portray dentistry as the caring profession that it is
- Explore the world of publishing

Who Should Attend This Program?

This session is of interest to Dentists, Dental Hygienists, Assistants, and Technologists.

Touch your soul!
Lift your spirit!
Tickle your funny bone!

Implant Overdentures - A Retrospective Analysis

Howard Klaiman, DDS, Cert. Prosth.
Toronto, Ontario

Time: 8:30 A.M. - 9:30 A.M.
Room: 206 F

Chair: Dr. Simone Seltzer

Of Interest To:

Dentists	
Dental Technologists	

About The Speaker

Dr. Howard Klaiman is an assistant professor at the University of Toronto, Faculty of Dentistry in the Implant Reconstruction Centre. He is a certified prosthodontist and is president of Toronto Dental Seminars and president-elect of the Association of Prosthodontists of Ontario. He has served as president of the Ontario Association of Dental Specialists and the Ontario Study Club of Osseointegration. Dr. Klaiman maintains a private practice in Toronto, specializing in prosthetics, implants and aesthetic dentistry.

About the Program

The use of implant-retained overdentures is often oversimplified and misunderstood. This concise seminar will look back at a few patients over a 15 year period and provide an understanding of how treatment planning, design of the prosthesis and a fundamental knowledge of occlusion can make or break your treatment

You Will Learn

- How to choose the right prosthetic design for tissue supported implant overdentures
- Clinical and laboratory techniques involved in prosthesis treatment
- Troubleshooting, maintenance and repair

Who Should Attend this Program?

This program is geared for dentists and dental technologists wishing to improve their knowledge in implant supported prosthesis.

Work Smart, Not Hard: Count on Your Numbers

Philip W. Minnaar, CA
Toronto, Ontario

Time: 9:45 A.M. - 10:45 A.M.

Room: 206 F

Chair: Dr. Jack Wasserman

Of Interest To:

Dentista	

About The Speaker

Philip Minnaar, Chartered Accountant, is an advisor and trusted accountant to a large number of dental practitioners. He has been concentrating his practice on dental practitioners for over 15 years. He is well-known in the industry and provides networking opportunities for clients.

About the Program

This lecture will reveal how to achieve financial success by monitoring the numbers produced in your practice. Learning how to collect data within your practice, such as new patient numbers, hygiene hours, days the practice is open for patients and learning how to analyze them, will help guide you towards your ultimate goals. Grasping and managing your practice's numbers, such as production, collection and expenses, will help you meet your personal and practice's financial needs. Learning how to work on your practice, and not just in it, is working smart.

You Will Learn

- How to create a business plan that will incorporate your personal and practice's financial needs
- Understanding what key information you require to run and manage your practice
- Turning reports into revenue
- What do good practice numbers mean?

Who Should Attend This Program?

This seminar is highly recommended, but not exclusive, to the dental practitioner with a practice.

Solving Everyday Clinical Challenges in Esthetic Restorative Dentistry

Peter Jordan
London, Ontario

Time: 11:15 A.M. - 12:15 P.M.

Room: 206 AB

Chair: Dr. Lynn Tomkins

Of Interest To:

Dentists	
Clinical Assistants	

About The Speaker

Peter Jordan is president and founder of Clinical Research Dental Supplies and Services Inc. and Clinician's Choice Dental Products. For 18 years, Mr. Jordan has been heavily involved in the dental industry as a CE provider, product developer and distributor, as well as an educator, throughout Canada and the United States. His extensive knowledge of current dental materials and techniques as well as his strong relationship with today's leading lecturers have assisted dentists in improving the quality of care provided to their patients in the field of esthetic and restorative dentistry. Mr. Jordan's father is the late Dr. Ronald Jordan.

About the Program

Clinical challenges are a part of every dentist's daily routine especially when they involve the ever-changing field of esthetic dentistry. Choosing the correct products and learning the proper techniques will allow you to become consistently more successful. This course is designed to provide a quick-paced review of common clinical challenges that face today's restorative dentist and provide clinically proven solutions that can easily be implemented in everyday practice.

You Will Learn

- Preventing post-op' sensitivity in direct posterior composite restorations
- Fast temporization techniques in crown and bridge including veneers
- Dual arch impression technique
- Polishing options for hybrid composites and porcelain

Who Should Attend This Program?

This program is geared for restorative dentists and their clinical assistants.

Properly Managing your Treatment Risks from a Litigation Lawyer's and Clinician's Perspective

**Robert Tighe, Barrister and Solicitor
Toronto, Ontario**

Time 11:15 A.M. - 1:15 P.M.
Room: 202 CD

Chair: Dr. Sydney Katzman

Of Interest To:

Dentists	

About the Speakers

Mr. Robert Tighe

Mr. Tighe has practiced civil and criminal litigation since being called to the bar in 1979. His Toronto based law firm has had experience in matters of prosecution and defence before all levels of courts and tribunals. He has a particular interest in health law.

Dr. Lionel Lenkinski

Dr. Lenkinski is a practicing endodontist in Toronto. He has developed a particular interest in risk management and standard of care issues as they relate to the practice of dentistry, and is frequently called upon as an expert in various legal proceedings. Lionel is a founding member and past-president of the Canadian Dental Protective Association. He is currently a risk management and case management advisor to CDPA.

**Lionel Lenkinski, DDS, Cert. Endo
Toronto, Ontario**

About the Program

In this clinic, issues arising in the course of a dentist's daily practice including the causes of breakdowns of communication between the dentist and patient will be discussed. There will be a discussion of changes in the law of informed consent, standards of care and appropriate referral to specialists. Case scenarios will be employed to analyze why patients sue their dentist and suggestions will be made to take steps to reduce and manage these risks.

You Will Learn

- The informed consent process
- How to assess the risk of a procedure prior to initiating treatment
- How to better document your records
- How to develop a professional support system for your practice
- How to manage situations when the treatment outcomes are less than desired
- When to seek legal advice

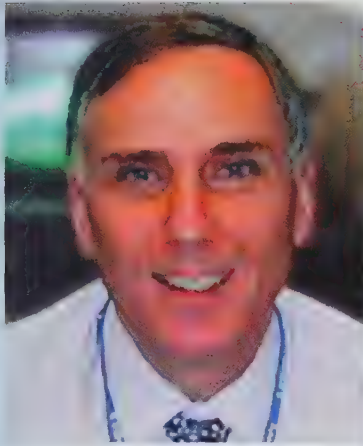

Who Should Attend This Program?

This program is geared for dentists who wish to understand why patients become unhappy with the care they receive and how to avoid the consequences.

THIS LECTURE IS SPONSORED BY CANADIAN DENTAL PROTECTIVE ASSOCIATION

Emerging Infectious Diseases - Why Should I Care?

Andrew E. Simor, MD, FRCPC
Toronto, Ontario

Time: 11:15 A.M. - 12:15 P.M.

Room: 202 AB

Chair: Dr. Sheryl Lipton

Of Interest To:

Dentists	Dental Hygienists
Clinical Assistants	Administrative Assistants

About The Speaker

Andrew Simor is head of the Department of Microbiology and Infectious Diseases, consultant at the Sunnybrook and Women's College Health Sciences Centre, a tertiary-care teaching hospital in Toronto, Ontario. He is also professor in the Departments of Laboratory Medicine and Pathology and Medicine at the University of Toronto. His research interests include studies of the epidemiology of antibiotic resistant organisms, the application of molecular technology to infectious diseases diagnostics and hospital epidemiology, and investigations regarding infectious diseases in the elderly.

About the Program

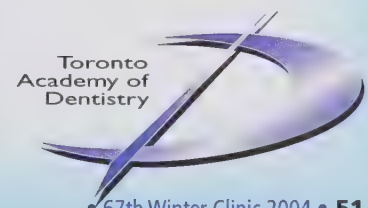

This session will include a discussion of recent emerging infectious diseases, a review of factors contributing to their spread, and provide a perspective on their impact on society at large and on dental practitioners in particular.

You Will Learn

- To understand the changing epidemiology of infectious diseases
- To appreciate factors determining the emergence and spread of new infectious agents
- To determine the impact emerging infectious diseases may have on the provision of health care in Canada

Who Should Attend This Program?

This program is geared for dentists, dental assistants, dental hygienists and other health care providers interested in updating their knowledge about infectious diseases and how it impacts on their daily practice.

HealOzone: Changing the Face of Dentistry

Stephen Gaines, DDS
Oakville, ON

Time: 11:15 A.M. - 12:15 P.M.
Room: 203 CD

Chair: Dr. Gene Cervini

Of Interest To:

Dentists	

About the Speaker

Dr. Steven Gaines is a graduate of the University of Michigan School of Dentistry, who maintains a general practice in Oakville Ontario. His practice encompasses all aspects of family dentistry, cosmetic and rehabilitation dentistry, laser and microdentistry.

Dr. Gaines speaks on topics related to the practical incorporation of new technologies into the general practice, laser dentistry, microdentistry – its philosophies, techniques and tools. He is a clinical instructor for the KaVo Key 3 Universal Laser system, presenting lectures and hands-on clinical training on its use in the general practice. Dr. Gaines is a Fellow and a Founding Member of the World Congress of Minimally Invasive Dentistry.

About the Program

Traditionally in dentistry, caries has been treated by surgical removal, often resulting in extensive tooth structure loss. A new approach sees the utilization of ozone gas to effectively sterilize the carious lesion and allow remineralization to occur. Pathfinder dentists have also had excellent results with ozone in the desensitization of teeth and the sterilization of root canals prior to obliteration. Clearly, the introduction of this technology offers much to the profession and even more to the patient.

You Will Learn

- Evidence-based caries intervention and reversal
- Ozone combines with traditional dentistry for larger lesions
- Using ozone for desensitization
- Patient response to ozone
- Current research and the future of ozone dentistry

Who Should Attend?

This program will be of interest to dentists interested in cutting edge research and treatment that could change forever the way we approach caries and hypersensitivity.

THIS LECTURE IS SPONSORED BY SciCan

Floor Plan

Meetings:

Planning a meeting? Contact the Academy office at (416) 967-5649 and we will record the date on the calendar and will inform you if there is a conflict with another meeting. Please advise speaker, location and contact person.

Our website at www.tordent.com lists all dental meetings recorded at our office and is updated monthly.

Associate Placement Services:

Looking for an associate in Metropolitan Toronto?

Looking for an associateship?

Call the Academy office at (416) 967-5649.

Emergency Services:

The Academy offers a daytime referral service as well as after hours emergency service.

There is only one telephone number for patients to call-during the day and after hours, (416) 967-5649.

After hours the number is call forwarded to an answering service. Leave only (416) 967-5649 on your answering machine.

DAYTIME HOURS MONDAY - FRIDAY: 8:30 a.m. - 4:30 p.m.

AFTER HOURS: Weekdays: 4:30 – 11 p.m.

SATURDAY, SUNDAY, HOLIDAYS

and any day the office is closed: 9 a.m. - 11 p.m.

If you are interested in becoming a member of the After Hours Emergency Service, and your practice is in Metropolitan Toronto and you are an ODA member, please call the Academy office at (416) 967-5649.

Every patient treated by an emergency service dentist on call is given a treatment record to take back to the patient's regular dentist.

Dr. Doug Jones
Chairman, Emergency Services

Contact Us:

Brush-a-Mania Another Great Success in 2004

Each year when April arrives, our thoughts naturally turn to three things – better weather, hockey playoffs, and of course, thousands of Toronto elementary school children all brushing their teeth in unison. April 2004 was no exception, and once again our annual Brush-a-Mania event was one of the highlights of Oral Health Month. The fourth annual Brush-a-Mania took place on April 21, 2004 at an unprecedented 90 elementary schools across the city. Volunteer dentists and Rotarians taught the children in a fun and interactive way about the many benefits of good oral health, and then culminated the event with a coordinated simultaneous three-minute brushing. This year, a total of 30,000 children were able to participate!

An event such as this cannot take place without the time, effort and energy of many volunteers. Thanks go out to all the member dentists who gave willingly of their time to make this event a huge success. Similarly, thanks are extended to our co-organizers at the Rotary Clubs of Greater Toronto and their many volunteers for their collaboration. Special thanks to our corporate sponsors, as their generosity enabled us to provide each participating child with a 'loot bag' containing a toothbrush, sugarless gum and an educational booklet. Finally, thanks and appreciation to the Brush-a-Mania committee for another outstanding effort. The Brush-a-Mania committee was once again chaired by Dr. Raffy Chouljian, whose commitment to this event once again translated into a very rewarding and successful day.

For more information or to register for Brush-a-mania 2005, please visit our website at www.donmillsrotary.ca/brush.htm

90 schools and over 30,000 students participated this year!

Many thanks to the Brush-a-Mania 2004 Sponsors

Toronto Academy of Dentistry Service Award

Mr. Kenneth J. Croney

Ken Croney was born, raised and educated right here in Toronto. At the age of seventeen Ken decided that he would like to pursue sales as a career, and through a fortunate fluke Ken found himself on a territory in Northern Ontario selling dental supplies. Early in his career he received good advice from two of the men who were the backbone of the dental industry, Jack and Ray McTavish, who told him the road to success was to give nothing but world-class service to each and every client.

Long before the phrase “24/7” became popular, Ken applied this motto to his career and worked long hours setting up young dentists in their practice and helping them to build a new office or renovate an old one. His journey with the dental industry has been exciting and varied. Over the years, Ken has worked with all the major dental dealers and has left his mark of professionalism on each and every one. Ken’s reputation for excellent personal service and expertise has enabled him to establish long-term relationships with his dentist clients. Now he has the opportunity to set up practices for the sons and daughters of many of his first clients. Always unassuming, Ken enjoys solid relationships with many people connected to the dental industry. He has always believed that you need to support the profession that you work in and has been the founder of many entertaining ski days and golf tournaments to bring the profession and industry together on both a personal and professional basis. Ken has worked many years with the Toronto Academy of Dentistry,

supporting their work with children less fortunate than some and raising money whenever asked to help out a good cause. His support of the ODA, the Faculty of Dentistry Alumni, the University of Toronto, the Royal College of Dental Surgeons, the Dental Industry Association of Canada, among others, is well known and much appreciated. It is almost impossible to find someone connected to the dental industry that has not been touched or helped by Ken Croney.

On the lighter side, Ken has always been able to be his own person, not affected by his position or worrying about what people think. He believes that work should be fun and that selling and serving are great opportunities to attract clients who want to get things done and do it right the first time.

Ken is married to his childhood sweetheart Julie and has a twelve-year-old daughter, Shannen, who is the apple of his eye. He has a passion for speed, and loves fast cars, boats and motorbikes. When there is time for relaxation you will find him at his cottage in Georgian Bay. However, don’t expect too much of his time should you drop in there, since he is usually on the phone, just checking on the details of his latest office plans. You see, some things just don’t change.

Service Award Recipients

Mr. Stewart Cannon, 2000

Mr. John Gillies, 2001

Mrs. Raisyl Wagman, 2002

Mr. John Paterson, 2003

Mr. Kenneth J. Croney, 2004

You've helped us help others

The Toronto Community Professional Dental Association continues in its efforts to donate to worthy beneficiaries.

Each year endowments are made based on the following categories:

• Toronto Based • Dental Related • Child Oriented • Education/ Research • Challenged Individuals • Deprived Individuals

The dental profession and the dental industry continue to support the academy's continuing education programs and social events and as a result in 2004, the Toronto Community Professional Dental Association was able to make donations to:

Children's Aid Foundation: \$25,000

**University of Toronto - Faculty of Dentistry,
Department of Oral & Maxillofacial Surgery: \$3,000**

The Toronto Community Professional Dental Association, through its endowment fund, established the Toronto Academy of Dentistry Dental Fund at the Children's Aid Foundation. This fund services some of the 40,000 children in Metropolitan Toronto under the auspices of The Children's Aid Society, the Catholic Children's Aid Society and The Jewish Family and Child Services. The money raised has helped approximately 80 children who otherwise would have been unable to receive those services so essential to their dental and emotional well-being.

In 2003, through ticket and auction sales at the Teddy Bear Affair, we donated \$40,000 to the Toronto Academy of Dentistry Dental Fund, bringing our total to \$373,445 since 1996.

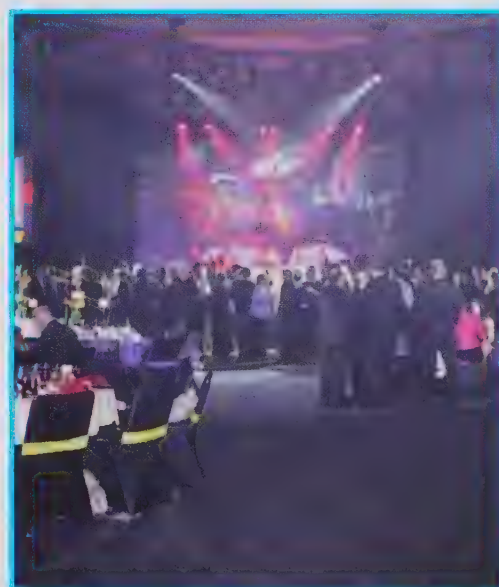

The 18th Annual Teddy Bear Affair will be held on Saturday, Nov 27th 2004

Please consider joining us as at this black tie gala. All funds generated through academy members go directly to our dental fund at the Children's Aid Foundation.

The Teddy Bear Affair attracts 900 of Toronto's corporate and social elite and it is considered by many to be the best gala in the city, raising funds for thousands of high-risk children.

The Toronto Academy of Dentistry, through the Toronto Community Professional Dental Association thanks the profession and the dental industry for enabling it to continue to identify and support worthy causes in the Greater Toronto Area.

Cardiac Ski Day 2004

Cardiac Ski Day was held on Friday, Feb 27th at Devil's Glen Ski Club in Collingwood. This day was presented by the Canadian Cardiac Rehabilitation Foundation in association with the Toronto Academy of Dentistry, Ash Temple Ltd. and the U of T Faculty of Dentistry Alumni Association. More than 150 participants enjoyed the beautiful sunny weather and the excellent skiing and snowboarding conditions. The complimentary bus left from the CCRF office Friday morning with one stop at the King Sideroad and returned about 7 p.m. that night with tired but happy bodies.

During the day, the participants were treated to a European breakfast, a BBQ lunch and an après ski party. Dr. Paul Taylor was the winner of the 50/50 draw and he generously donated his winnings back to the charity. Many others walked away with wonderful raffle prizes. Also, during the day the Remax balloon was offering tethered rides which many took advantage of.

Our thanks to co-chairs, Dr. Phil Shedletsky, Dr. Tim Milligan and Iain Hunter along with their dedicated committee for a fantastic day.

Mark your calendar for the last Friday in February to attend Cardiac Ski Day 2005.

Circle of Honor Award for Philanthropy

Awarded to

THE TORONTO ACADEMY OF DENTISTRY

for its exceptional contribution to enabling children and youth with disabilities and their families

Presented by the Board of Trustees on June 23, 2004

CIT Toronto Dental Charity Golf Classic

Once again, the annual CIT Toronto Dental Charity Golf Classic, generously sponsored by CIT Financial, was held at Copper Creek Golf Club, on Friday, June 18, 2004. As a key supporter of the Bloorview MacMillan Children's Foundation for over 20 years, the Toronto Academy of Dentistry has raised over \$400,000 to date. These funds have benefited the dental program at the centre by enabling the purchase of specialized equipment such as new ultrasound technology to assist in the diagnosis and treatment of children with swallowing and feeding disorders, as well as important program enhancements. All proceeds from registration, raffles, contests and auctions through dentists and the dental industry supports children with physical disabilities to become the best they can possibly be.

Thank you to Julie Brown and the Bloorview volunteers for their assistance on the day. Thanks also to Mike King for selling raffle tickets and Dave Lind for selling hole sponsorships.

INTRODUCING THE DEPROGRAMMER

We would like to introduce you to an interesting new product. Our deprogramming splint is designed to allow only central incisor contact in all excursions. This therapeutic function stimulates the body's natural reflex protection to calm the powerful temporalis muscles and suppress the active lateral pterygoid muscles.

DSC Dental Services Group
of Toronto

A DENTAL SERVICES GROUP LABORATORY

572 Champagne Drive,
Toronto, Ontario M3J 2T9
416-654-6365 1-800-268-1860

The device provides chronic pain relief and is gaining popularity among our customers.

The deprogrammer is professionally fabricated from Eclipse™ light cure material, custom designed for retention, and is both comfortable and small.

For more information or to find out how you can get a sample splint to show your patients, contact **Joanne Friedman**.

Mediations Report

Gilbert Chapnick, D.D.S., F.I.C.D.
Mediations Coordinator

As dental professionals, it is our responsibility to provide quality care to our patients. Through surveys comparing different professions, our profession remains near the top, showing that the public has much respect and trust for dentists.

Commercial advertising and computer websites have made the media aware of beautiful smiles and procedures that can be had to improve the appearance and health of our teeth. Patients, however, do not understand the treatment and are unaware of what is necessary to accomplish what they have read or seen. It is therefore advisable for us to explain the benefits, risks, alternatives and costs before commencing expensive treatment. They must know that porcelain veneers do break, teeth that are undergoing root-canal treatment may require crowns, implants require healing time, and so on. This discussion should be documented and filed with the patients records and can be referred to should misunderstandings arise.

In the year 2003, our competent staff of Pat McCance and Andrea Antal have responded to two hundred telephone requests from the public for information pertaining to problems they have encountered with their dentist. The members of the mediations committees, from the four Toronto dental societies, have reviewed approximately thirty written complaints from patients. In a fair, compassionate and reasonable approach, they have succeeded in almost all cases to resolve the concerns between the patient and dentist.

The mediations service, offered through the Toronto Academy of Dentistry is by far one of the best reasons to be a member of this organization.

Congratulations

Each year the University of Toronto, Faculty of Dentistry awards prizes donated by
the Toronto Academy of Dentistry.

The awards are given to two outstanding students in the departments of Paedodontics (4th Year),
and in Community Dentistry (3rd Year).

The 2003-2004 Winners:

Mr. Justin W.J. Garbedian, Paedodontics

Mr. David Cheng, Community Dentistry

Past Presidents

The past presidents of the Toronto Dental Society are identified as past presidents of this academy.
Below is a list of past presidents from 1891 to 2004

Honourary Life Membership 2004

Gordon Nikiforuk,
D.D.S., M. Sc., F.I.C.D.

The Toronto Academy of Dentistry is pleased to award its Honourary Life Membership to Dr. Gordon Nikiforuk in recognition of his outstanding contribution to dentistry and his community.

Dr. Nikiforuk was born and raised in Redfield, in rural Saskatchewan. After finishing high school, he took his pre-dental training at the University of Saskatchewan and then transferred to the University of Toronto, where he received his D.D.S. in 1947. Moving on to the University of Illinois, he earned his M.Sc. (Biochemistry) in the Department of Biochemistry and his Specialty Certificate in Paedodontics at the School of Dentistry in 1950.

To try to list all of Gordon's accomplishments would take a large part of the evening. He has done it all; teaching, writing, research, administration. In doing so, he has earned an international reputation for excellence.

To list just a few of his accomplishments, he began his career in 1956 at the University of Toronto Faculty of Dentistry as associate professor. In 1965 he moved to the University of California, Los Angeles, where he served in several capacities. He was professor of Pediatric Dentistry in both the medical and dental faculties, the chairman of the division of Oral Biology and acting dean of the Dental Faculty. He returned to Toronto in 1970 to become dean of the Faculty of Dentistry for seven years.

From the beginning, he has been involved in research, both academically and as an advisor to industry. While at U.C.L.A., he was director of the Dental Research Institute and later, president of the Canadian Association for Dental Research, among others. He has been active in many professional societies and organizations and also was a member and president of the Royal College of Dental Surgeons of Ontario. He has authored well over a hundred papers relating to scientific and educational subjects, and two-volume texts, *Understanding Dental Caries*, recognized worldwide as the most highly respected resource in the field. He has also lectured internationally. Dr. Nikiforuk initiated and edited *The Oral Care Report*, a newsletter that reaches more than 200,000 dental professionals in more than 800 countries under the sponsorship of Colgate.

To quote one of Dr. Nikiforuk's peers, "He is one of the most outstanding scientific and academic dentists Canada has ever produced."

Dr. Nikiforuk is dedicated to the concept that prevention is the key to so many health dilemmas worldwide. The area of prevention is a family affair for the Nikiforuks.

His wife, Marge, is a public health nurse, a teacher in parenting in public health, and the founder of the first parent's environmental health group called Parents for the Environmentally Sensitive.

Andrew, the older son, has won the Atkinson Award, the top award for investigative journalism, and recently won the Governor-General award for best non-fiction in Canada, for his book *Saboteurs*.

Christian, the younger, is the first graduate from Queens Law School by a correspondence course. In spite of a serious bout with trigeminal neuralgia he is making headway with the application of information technology in international communications and conventions.

MediaEDGE

PUBLISHING INC.

We're not just publishers.

*We're partners,
collaborators
and advisors.*

With MediaEdge, you can place the burden of publishing on us without sacrificing any of the control of your publication or your corporate image. Our professional work will be done behind the scenes, on your behalf and under your guidance, to produce YOUR magazine or directory to your exacting specifications.

The MediaEdge staff is available to you at all times, creating your copy, suggesting new directions for articles, researching trends, identifying opportunities, proofreading, and (most importantly) keeping the entire project on-track and on-schedule.

By working with MediaEdge, you can turn your publication over to professional publishers, freeing your staff time and resources to work on your own specialties and priorities.

The MediaEdge Advantage:

- Fastest turnaround times
- Best customer service
- Flexible and adaptable to your needs
- First-hand trade association experience
- Diverse team of professionals for each project
- Specialists in start-up ventures
- Dedicated professional design and editorial teams

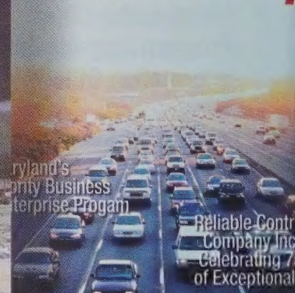

Portfolio of Products and Services:

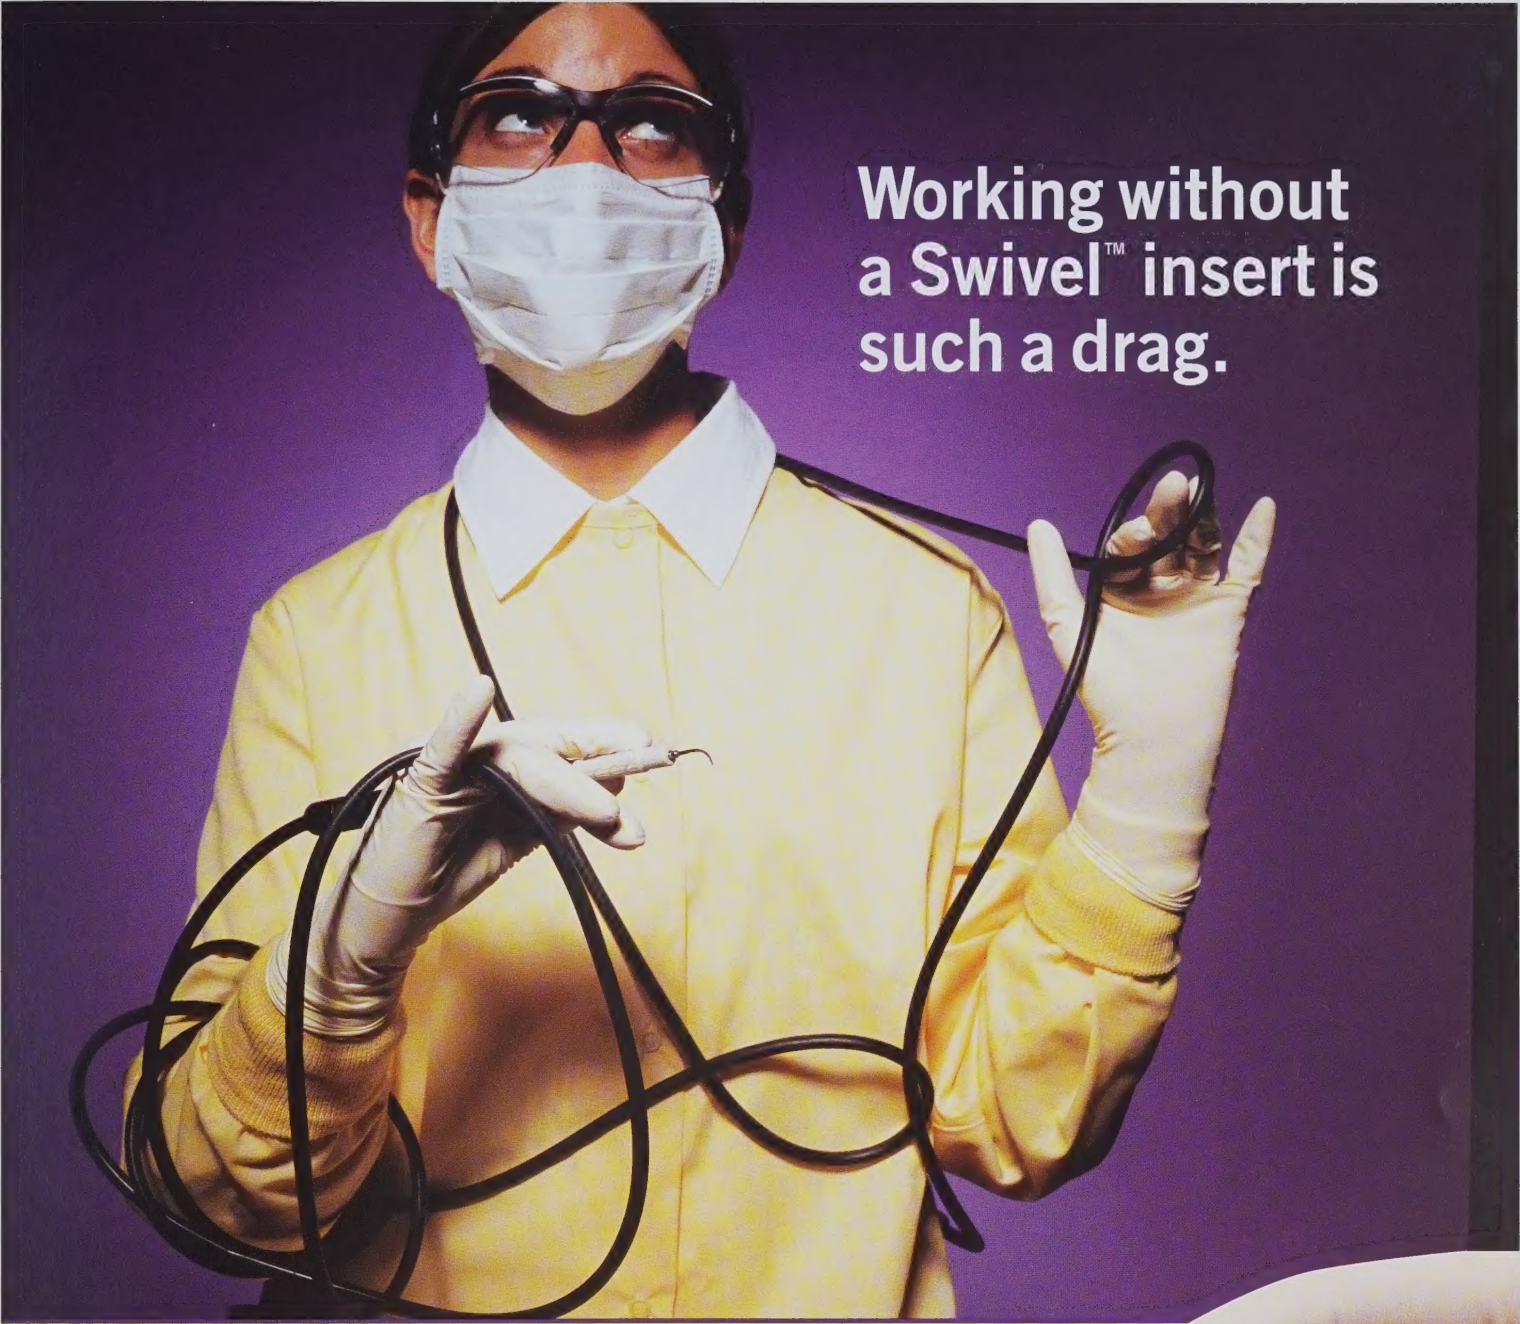

- Full Range of Publications • In-house Publishing
- Printing Services • Trade Show Management
- Association Membership Campaigns

We can meet your association publishing needs, please contact:

EXTRAORDINARY BEAUTY. CLINICAL EXCELLENCE.

WHEN VITA
CREATED
VITA® VM 7,
A SMALL-PARTICLE, LOW-WEAR
ALL-CERAMIC
PORCELAIN TO
MATCH THEIR POPULAR
3D-MASTER® SHADES,
THEY REALIZED THEY HAD
A TRULY UNIQUE VENEERING
PORCELAIN AND THOUGHT, "WHY
STOP NOW?"

SO THEY PRODUCED TWO INCREDIBLE
PORCELAINS — ONE FOR ALUMINOUS
ALL-CERAMIC FRAMEWORKS (VM 7) AND ONE FOR
DENSELY-SINTERED ZIRCONIA FRAMEWORKS, CALLED **VITA®
VM 9**. NOW YOU HAVE YOUR CHOICE OF TWO CLINICALLY
SUPERIOR ALL-CERAMIC PORCELAINS WITH A FULL COMPLEMENT OF
MODIFIERS FOR INCREDIBLE **ENAMEL WEAR**
CHARACTERISTICS AND **UNPRECEDENTED NATURAL ESTHETICS**.

ASK ABOUT THE VITA® VM FAMILY TODAY.
